**Daniel Unsealed Dan Bruce 2013-07-01** More than two-thousand years have passed since the seven chrono-specific predictive prophecies in the Book of Daniel were sealed up to prevent them from being prematurely understood. After the command to seal them was given by God, it was revealed in the Bible that the prophecies would not remain sealed up forever, but would again be unsealed for understanding at the time of the end. Now, twenty-five hundred years after they were sealed up in ancient Babylon, the prophecies have been unsealed in modern Israel. The event used to announce the unsealing to the world occurred in Jerusalem during the Six-Day War, namely, the return of the Temple Mount to Jewish sovereignty on June 7, 1967. The eschatological significance of that event went unnoticed by biblical scholars and theologians at the time it happened, but it has since turned out to be the key that was needed to unlock and understand all of the Danielic prophecies. Using the interpretive key that was revealed for the world to see when the Temple Mount was liberated by Israel in 1967, biblical scholar and sacred chronologist Dan Bruce has interpreted the Danielic prophecies anew for this generation. His Bible-based exposition fully explains the seven chrono-specific predictive prophecies that were sealed up in the Book of Daniel so long ago. His fresh new interpretations are cogent and unique, and give undeniable proof that the God of the Bible always has been, and still is, actively engaged in the affairs of mankind. By showing how the past two-thousand-plus years of Jewish history were foretold by the chrono-specific prophecies in Daniel and how, one by one, those prophecies have been fulfilled in history exactly as predicted—with some being fulfilled as recently as 1967—this book will open the eyes and ears of anyone who questions the reality of God's sovereign presence in the world today. Note that the interpretations of the Danielic prophecies in this book replace and/or make obsolete the interpretations of the prophecies found in the Book of Daniel, chapters 4 and 7-12, as explained in the commentaries of the following expositors: Jim Allen, Max E. Anders, Robert M. Anderson, Gleason L. Archer, Joyce Baldwin, Carl Beckwith, James M. Boice, C. C. Carlson, Corrine L. Carvalho, Robert B. Chisholm Jr., John Hersh Collins, Stephen L. Cook, Philip R. The interpretations are NOT based on, derivative of, or associated with the work of any of the following groups or persons who have been active in the field of sacred chronology: The Watchtower Society, The Seventh-day Adventist Church, The LDS Church, The Institute for Creation Research and similar creationist groups, Donovan Courville, Rolf Furuli, David Rohl, Peter James, Immanuel Velikovsky, and similar.

**New Insights Into Retinal Degenerative Diseases Robert E. Anderson 2012-12-06** Since 1984, we have organized satellite symposia on retinal degenerations that are held in conjunction with the biennial International Congress of Eye Research. The timing and location of our Retinal Degeneration Symposia have allowed scientists and clinicians from around the world to convene and present their exciting new findings. The symposia have been arranged to allow ample time for discussions and one-on-one interactions in a relaxed atmosphere, where international friendships and collaborations could be established. The IXth International Symposium on Retinal Degeneration was held on October 9-14, 2000 in Durango, Colorado and was attended by over 100 scientists from six continents. This book contains many of their presentations. Several events of note occurred at this meeting. First, thanks to the generous support of the Foundation Fighting Blindness, we were able to sponsor the travel of 11 young scientists from six countries. Most of them have contributed chapters to this volume. The response to the travel program was so overwhelming that we will make it regular feature of our meeting. This will allow other bright, young investigators to be introduced to the world experts who study retinal degenerations. Second, about 40% of the scientists who attended this meeting were there for the first time. We believe that this indicates a growing interest in retinal degeneration research and ensures that new talent will be attracted to this important area of investigation. The symposium received support from several organizations.
