The Principles of Riding German Equestrian Federation 2017-07-10 "The first edition of The Principles of Riding was published more than 50 years ago, imparting mandatory basic knowledge for all areas of equestrian sport and horse-keeping and this 28th edition, Basic Training for Horse and Rider, has been completely revised regarding language and content, while still taking into account the well-established principles. The consideration of traditional principles leads to the education and training of the horse according to its nature and thus to its health, well-being and performance capability. The horse's instincts and natural behaviour are presented in detail as the basis of communication and understanding between horse and rider. Modern scientific research relating to training theory and biomechanics has influenced the systematic training of the rider as well as that of the horse. The Principles of Riding provides versatile, practical assistance to horse lovers and readers of this book who want to learn, irrespective of whether they ride for leisure or competitively, are interested in hacking or hunting, or want to develop and improve their basic training for dressage, show-jumping or eventing. These Principles should be indispensable for all riders, drivers, trainers and judges, and to all of those who are interested in the appropriate training of the horse, according to the horse's nature, and who place importance on a harmonious cooperation between horse and rider." -- Amazon.com.

The Funding of School Education Collectif 2017-06-26 This report on the funding of school education constitutes the first in a series of thematic comparative reports bringing together findings from the OECD School Resources Review. School systems have limited financial resources with which to pursue their objectives and the design of school funding policies plays a key role in ensuring that resources are directed to where they can make the most difference. As OECD school systems have become more

complex and characterised by multi-level governance, a growing set of actors are increasingly involved in financial decision-making. This requires designing funding allocation models that are aligned to a school system's governance structures, linking budget planning procedures at different levels to shared educational goals and evaluating the use of school funding to hold decision makers accountable and ensure that resources are used effectively and equitably. This report was co-funded by the European Commission. .

World-Class Grooming for Horses Cat Hill 2019-11-15 When owning, training, riding, and showing horses, there is a certain "look" to which one aspires. World-class "turnout"--a horse in peak condition, perfectly coiffed and luminous with health, outfitted with gleaming and well-fit tack appropriate for his sport--can take your breath away. And while it can certainly play a significant role in a competitive rider's success, it is just as appealing to have any horse "groomed to the nines," whether he's headed for an afternoon lesson or just out on the trail. Achieving this superior look is not just about clean tack, shiny brass, spotless stockings, or perfect braids. The most important steps are in the day-to-day nitty-gritty of grooming and caring for the horse: noticing "something not-quite-right" about the way the horse looks or moves before it becomes "something wrong"; brushing and combing and trimming a little every day so the horse's skin and coat remain healthy; knowing how to prepare a horse properly for training, and how to cool him down afterward. Now, two of the best professional grooms in the business share their trade secrets, with over 1200 color photographs accompanying the ultimate modern-day guide for all riders who want their horses to look and feel their best.
