Scientific and Technical Translation Explained Jody Byrne 2014-04-08 From microbiology to nuclear physics and chemistry to software engineering, scientific and technical translation is a complex activity that involves communicating specialized information on a variety of subjects across multiple languages. It requires expert linguistic knowledge and writing skills, combined with the ability to research and understand complex concepts and present them to a range of different audiences. Using a combination of interdisciplinary research, real-world examples drawn from professional practice and numerous learning activities, this introductory textbook equips the student with the knowledge and skills needed to get started in this exciting and challenging field. It examines the origins and history of scientific and technical translation, and the people, tools and processes involved in translating scientific and technical texts. Scientific and Technical Translation Explained provides an

overview of the main features of scientific and technical discourse as well as the different types of documents produced. A series of detailed case studies highlight various translation challenges and introduce a range of strategies for dealing with them. A variety of resources and exercises are included to make learning effective and enjoyable. Additional resources and activities are available on Facebook.

Partial Faiths John A. McClure 2010-01-25 Spiritual conversions figure heavily in such novels as Thomas Pynchon's *Vineland*, Toni Morrison's *Paradise*, and Louise Erdrich's *Love Medicine*. What connects such varied works is that their convert-characters are disenchanted with secularism yet apprehensive of dogmatic religiosity. *Partial Faiths* is the first study to identify a body of contemporary fiction in such terms, take the measure of its structures and strategies, and evaluate its contribution to public discourse on religion's place in postmodern life. Postsecularism is most often associated with philosophers and theorists such as Jacques Derrida, Richard Rorty, Charles Taylor, William Connolly, Jürgen Habermas, and Gianni Vattimo. But it is also being explored and invented, says John A. McClure, by many novelists: Leslie Marmon Silko, Don DeLillo, Michael Ondaatje, and N. Scott Momaday among others. These novelists, who are often regarded as belonging to different domains of contemporary fiction, are fleshing out the postsecular issues that scholars treat more abstractly. But the modes of belief elaborated in these novels and the new narrative forms synchronized with these modes are dramatically partial and open-ended. Postsecular fiction does not aspire to any full "mapping" of the reenchanted cosmos or any formal moral code, nor does it promise anything like full redemption. It is partial in another sense as well: it is emphatically dedicated to progressive ideals of social transformation and well-being, in repudiation of resurgent fundamentalist prescriptions for the same.

Identity in Narrative Anna De Fina 2003-10-27 This volume presents both an analysis of how identities are built, represented and negotiated in narrative, as well as a theoretical reflection on the links between narrative discourse and identity construction. The data for the book are Mexican immigrants' personal experience narratives and chronicles of their border crossings into the United States. Embracing a view of identity as a construct firmly grounded in discourse and interaction, the author examines and illustrates the multiple threads that connect the local expression and negotiation of identity to the wider social contexts that frame the experience of migration, from material conditions of life in the United States to mainstream discourses about race and color. The analysis reveals how identities emerge in discourse through the interplay of different levels of expression, from implicit adherence to narrative styles and ways of telling, to explicit negotiation of membership categories.

Rolando Hinojosa's Klail City Death Trip Series Stephen Miller 2013

Mirroring the linguistic and cultural evolution of those living on the Texas-Mexico border, Rolando Hinojosa's Klail City Death Trip Series examines relations between Mexican Americans and Anglo Americans born and raised in the fictional Rio Grande Valley town of Klail City Texas. Depicting the transformation of a place and its people "from a sleepy agricultural and ranching backwater of Mexican and American society and history" over a 30-year period, the series comprises fifteen books, published between 1973 and 2006, and reflects the importance of the growing Hispanic population in the U.S. The people of Hinojosa's Klail City, which has been compared to William Faulkner's Yoknapatawpha County and Gabriel García Márquez's Macondo, have dealt with the same issues as their real-life counterparts living along the border, including discrimination, generational change, drug violence and the quest for women's rights. The editors of this scholarly volume assert in their introduction that the series, with volumes in English, Spanish and a mix of both languages, "may well be the most innovative and complex project of literary creation ever conceived and realized by a writer based in the United States." The eleven essays in this volume consider both broad and specialized aspects of the Klail City Death Trip Series. Divided into two sections, the chapters in the first half examine the series as a whole and look at general topics such as cultural hybridity, the individual's needs versus those of society and the influence of Hispanic literary tradition on Hinojosa's work. The essays in the second half explore more specific aspects, including Klail City youth going to war, women's search for autonomy in the face of societal and familial tradition and a comparison of Hinojosa's *The Valley* with Larry McMurtry's *The Last Picture Show* as examples of Hispanic and Anglo literary traditions that developed in the same region. Also included is an interview with Rolando Hinojosa, the Ellen Clayton Garwood Professor of Creative Writing at the University of Texas at Austin. He is the recipient of numerous literary awards, including the most prestigious prize in Latin American fiction, Casa de las Américas, for the best Spanish American novel in 1976 and the Premio Quinto Sol, the National Award for Chicano Literature, in 1972. This collection is an essential tool for scholars and students alike in understanding the work of Rolando Hinojosa and the people living a bilingual, bicultural life along the Texas-Mexico border.

Illegal Encounters Deborah A. Boehm 2019-02-19 The impact of the U.S. immigration and legal systems on children and youth In the United States, millions of children are undocumented migrants or have family

members who came to the country without authorization. The unique challenges with which these children and youth must cope demand special attention. *Illegal Encounters* considers illegality, deportability, and deportation in the lives of young people—those who migrate as well as those who are affected by the migration of others. A primary focus of the volume is to understand how children and youth encounter, move through, or are outside of a range of legal processes, including border enforcement, immigration detention, federal custody, courts, and state processes of categorization. Even if young people do not directly interact with state immigration systems—because they are U.S. citizens or have avoided detention—they are nonetheless deeply affected by the reach of the government in its many forms. Contributors privilege the voices and everyday experiences of immigrant children and youth themselves. By combining different perspectives from advocates, service providers, attorneys, researchers, and young immigrants, the volume presents rich accounts that can contribute to informed debates and policy reforms. *Illegal Encounters* sheds light on the unique ways in which policies, laws, and legal categories shape so much of daily life for young immigrants. The book makes visible the burdens, hopes, and potential of a population of young people and their families who have been largely hidden from public view and are currently under siege, following their movement through complicated immigration systems and institutions in the United States.

Decolonizing Philosophies of Education Ali A. Abdi 2012-01-01 Philosophy of education basically deals with learning issues that attempt to explain or answer what we describe as the major questions of its domains, i.e., what education is needed, why such education, and how would societies undertake and achieve such learning possibilities. In different temporal and spatial intersections of people's lives, the design as well as the outcome of such learning program were almost entirely indigenously produced, but later, they became perforce responsive to externally imposed demands where, as far as the history and the actualities of colonized populations were concerned, a cluster of de-philosophizing and de-epistemologizing educational systems were imposed upon them. Such realities of colonial education were not conducive to inclusive social well-being, hence the need to ascertain and analyze new possibilities of decolonizing philosophies of education, which this edited volume selectively aims to achieve. The book should serve as a necessary entry point for a possible re-routing of contemporary learning systems that are mostly of de-culturing and de-historicizing genre. With that in mind, the recommendations contained in the 12 chapters should herald the potential of decolonizing philosophies of education as liberating learning and livelihood praxes. "This collection of critical and scholarly analyses provides an insightful and timely resource for decolonizing philosophies of education that continue to shape discourses, policies, curricula and practices in all levels of educational and social institutions. It also

usefully challenges versions of postcolonial studies that fail to recognize and demystify the continuity of colonial hegemony in contemporary societal formations in both the global north and south.” Toh Swee-Hin, Distinguished Professor, University for Peace, Costa Rica & Laureate, UNESCO Prize for Peace Education (2000) “Decolonizing philosophies of education edited by Ali A. Abdi is a collection of twelve essays by noted scholars in the field who provide strong readings of postcolonialism in education with an emphasis on decolonizing epistemologies. It provides a clear and comprehensive introduction to the critical history of colonization, postcolonial studies and the significance of education to the colonial project. This is an important book that provides a global perspective on the existential and epistemological escape from the colonial condition.” Michael A. Peters, Professor, Educational Policy Studies, University of Illinois at Urbana-Champaign

Interviews/Entrevistas Gloria E. Anzaldua 2020-04-28 Gloria E. Anzaldúa, best known for her books *Borderlands/La Frontera* and *This Bridge Called My Back*, is one of the foremost feminist thinkers and activists of our time. As one of the first openly lesbian Chicana writers, Anzaldúa has played a major role in redefining queer, female, and Chicano/a identities, and in developing inclusionary movements for social justice. In this memoir-like collection, Anzaldúa's powerful voice speaks clearly and passionately. She recounts her life, explains many aspects of her thought, and explores the intersections between her writings and postcolonial theory. Each selection deepens our understanding of an important cultural theorist's lifework. The interviews contain clear explanations of Anzaldúa's original concept of the Borderlands and *mestizaje* and her subsequent revisions of these ideas; her use of the term *New Tribalism* as a disruptive category that redefines previous ethnocentric forms of nationalism; and what Anzaldúa calls *conocimientos*-- alternate ways of knowing that synthesize reflection with action to create knowledge systems that challenge the status quo. Highly personal and always rich in insight, these interviews, arranged and introduced by AnaLouise Keating, will not only serve as an accessible introduction to Anzaldúa's groundbreaking body of work, but will also be of significant interest to those already well-versed in her thinking. For readers engaged in postcoloniality, feminist theory, ethnic studies, or queer identity, *Interviews/Entrevistas* will be a key contemporary document.

The Rag Doll Plagues Alejandro Morales 1992-01-01 A mysterious plague is decimating the population of colonial Mexico. One of His Majesty's highest physicians is dispatched from Spain to bring the latest advances in medical science to the backward peoples of the New World capital. Here begins the cyclical tale of man battling the unknown, of science confronting the eternally indifferent forces of nature. Morales takes us on a trip through ancient and future civilizations, through exotic but all-too-familiar cultures, to a final confrontation with our own ethics and world

views. In later chapters, the colonial physician finds his successors as they once again engage in life or death struggles, attempting to balance their own hopes, desires and loves with the good society and the state. Book II of the novel takes place in modern-day southern California, and Book III in a futuristic technocratic confederation known as Lamex. In the tradition of Latin American born novelist, Alejandro Morales is one of the finest representatives of magic realism in the English language. In *The Rag Doll Plagues*, Morales creates a many layered fictional world, taking us on an entertaining and thought-provoking safari thorough lands, times, peoples and ideas never before encountered or presented in this manner. But ultimately, this valuable trip leads to a reacquaintance with our own society and its moral vision.

Individual Differences in Arithmetic Ann Dowker 2019-03-27 Arithmetic is still hugely important in many aspects of modern life, but our personal attitudes to it differ greatly. Many people struggle with the basic principles of arithmetic, whilst others love it and feel confident in their arithmetical abilities. Why are there so many individual differences in people's performance in, and feelings about, arithmetic? *Individual Differences in Arithmetic* explores the idea that there is no such thing as arithmetical ability, only arithmetical abilities. The book discusses several important components of arithmetic, from counting principles and procedures to arithmetical estimation, alongside emotional and cognitive components of arithmetical performance. This edition has been extensively revised to include the latest research, including recent cross-cultural and cross-linguistic research, the development of new interventions for children with difficulties and studies of early foundations of mathematical abilities. Drawing on developmental, educational, cognitive and neuropsychological studies, this book will be essential reading for all researchers of mathematical cognition. It will also be of interest to educators and other professionals working within individuals with arithmetic deficits.

House of Nepantla Irene Reti 2017-09-21 Writer and photographer Irene Reti lived with her friend/comadre Gloria Evangelina Anzaldúa (September 26, 1942 - May 15, 2004) for ten years in a house on the edge of the sea in Santa Cruz, California. This photoessay interweaves images of Anzaldúa's house, and the border between ocean and land from where Anzaldúa drew inspiration and solace in the last period of her life. In her writing, Reti wrestles her grief over Anzaldúa's death from diabetes at age 61, but also pays tribute to the enduring prophetic power of Anzaldúa's theory of nepantla (in-between-ness/liminality), which is ever more relevant more than a decade after her death.

Prediction of Turbulent Flows Geoff Hewitt 2005-06-08 The prediction of turbulent flows is of paramount importance in the development of complex engineering systems involving flow, heat and mass transfer, and chemical reactions. Arising from a programme held at the Isaac Newton Institute in Cambridge, this volume reviews the current situation regarding the prediction of such flows through the use of modern computational fluid dynamics techniques, and attempts to address the inherent problem of modelling turbulence. In particular, the current physical understanding of such flows is summarised and the resulting implications for simulation discussed. The volume continues by surveying current approximation methods whilst discussing their applicability to industrial problems. This major work concludes by providing a specific set of guidelines for selecting the most appropriate model for a given problem. Unique in its breadth and critical approach, this book will be of immense value to experienced practitioners and researchers, continuing the UK's strong tradition in fluid dynamics.

Columbus and Other Cannibals Jack D. Forbes 2011-01-04 Celebrated American Indian thinker Jack D. Forbes's *Columbus and Other Cannibals* was one of the founding texts of the anticivilization movement when it was first published in 1978. His history of terrorism, genocide, and ecocide told from a Native American point of view has inspired America's most influential activists for decades. Frighteningly, his radical critique of the modern "civilized" lifestyle is more relevant now than ever before. Identifying the Western compulsion to consume the earth as a sickness, Forbes writes: "Brutality knows no boundaries. Greed knows no limits. Perversion knows no borders. . . . These characteristics all push towards an extreme, always moving forward once the initial infection sets in. . . . This is the disease of the consuming of other creatures' lives and possessions. I call it cannibalism." This updated edition includes a new chapter by the author.

Neuropathology of Drug Addictions and Substance Misuse Volume 2
Victor R. Preedy 2016-03-25 *Neuropathology of Drug Addictions and Substance Misuse, Volume 2: Stimulants, Club and Dissociative Drugs, Hallucinogens, Steroids, Inhalants and International Aspects* is the

second of three volumes in this informative series and offers a comprehensive examination of the adverse consequences of the most common drugs of abuse. Each volume serves to update the reader's knowledge on the broader field of addiction as well as to deepen understanding of specific addictive substances. Volume 2 addresses stimulants, club and dissociative drugs, hallucinogens, and inhalants and solvents. Each section provides data on the general, molecular and cellular, and structural and functional neurological aspects of a given substance, with a focus on the adverse consequences of addictions. Research shows that the neuropathological features of one addiction are often applicable to those of others, and understanding these commonalities provides a platform for studying specific addictions in more depth and may ultimately lead researchers toward new modes of understanding, causation, prevention, and treatment. However, marshalling data on the complex relationships between addictions is difficult due to the myriad material and substances. Offers a modern approach to understanding the pathology of substances of abuse, offering an evidence-based ethos for understanding the neurology of addictions Fills an existing gap in the literature by serving as a "one-stop-shopping synopsis of everything to do with the neuropathology of drugs of addiction and substance misuse Includes in each chapter: list of abbreviations, abstract, introduction, applications to other addictions and substance misuse, mini-dictionary of terms, summary points, 6+ figures and tables, and full references Offers coverage of preclinical, clinical, and population studies, from the cell to whole organs, and from the genome to whole body

Urban Humanities Dana Cuff 2020-04-07 Original, action-oriented humanist practices for interpreting and intervening in the city: a new methodology at the intersection of the humanities, design, and urban studies. Urban humanities is an emerging field at the intersection of the humanities, urban planning, and design. It offers a new approach not only for understanding cities in a global context but for intervening in them, interpreting their histories, engaging with them in the present, and speculating about their futures. This book introduces both the theory and practice of urban humanities, tracing the evolution of the concept, presenting methods and practices with a wide range of research applications, describing changes in teaching and curricula, and offering case studies of urban humanities practices in the field. Urban humanities views the city through a lens of spatial justice, and its inquiries are centered on the microsettings of everyday life. The book's case studies report on real-world projects in mega-cities in the Pacific Rim—Tokyo, Shanghai, Mexico City, and Los Angeles—with several projects described in detail, including playful spaces for children in car-oriented Mexico City, a commons in a Tokyo neighborhood, and a rolling story-telling box to promote "literary justice" in Los Angeles.

Translation, Linguistics, Culture Nigel Armstrong 2005-01-01 This book takes a linguistic approach to translation issues, looking first at the structural view of language that explains the difficulty of translation and at theories of cultural non-equivalence. A subsequent chapter on text types, readership and the translator's role completes the theoretical framework. The linguistic levels of analysis are then discussed in ascending order, from morpheme up to sentence, while a summarising chapter considers various translation types and strategies, again considered in relation to text type, author and reader.

The Politics of the Artificial Victor Margolin 2018-01-11 Emerging from the world of commercial art and product styling, design has now become completely integrated into human life. Its marks are all around us, from the chairs we sit on to the Web sites on our computer screens. One of the pioneers of design studies and still one of its most distinguished practitioners, Victor Margolin here offers a timely meditation on design and its study at the turn of the millennium and charts new directions for the future development of both fields. Divided into sections on the practice and study of design, the essays in *The Politics of the Artificial* cover such topics as design history, design research, design as a political tool, sustainable design, and the problems of design's relation to advanced technologies. Margolin also examines the work of key practitioners such as the matrix designer Ken Isaacs. Throughout the book Margolin demonstrates the underlying connections between the many ways of reflecting on and practicing design. He argues for the creation of an international, interdisciplinary field of design research and proposes a new ethical agenda for designers and researchers that encompasses the responsibility to users, the problems of sustainability, and the complicated questions of how to set boundaries for applying advanced technology to solve the problems of human life. Opinionated and erudite, Victor Margolin's *The Politics of the Artificial* breaks fresh ground in its call for a new approach to design research and practice. Designers, engineers, architects, anthropologists, sociologists, and historians will all benefit from its insights.

Twentieth Century Theatre: A Sourcebook Richard Drain 2002-09-11 Twentieth Century Theatre: A Sourcebook is an inspired handbook of ideas and arguments on theatre. Richard Drain gathers together a uniquely wide-ranging selection of original writings on theatre by its most creative practitioners - directors, playwrights, performers and designers, from Jarry to Grotowski and Craig. These key texts span the twentieth century, from the onset of modernism to the present, providing direct access to the thinking behind much of the most stimulating theatre the century has had to offer, as well as guidelines to its present most adventurous developments. Setting theory beside practice, these writings bring alive a number of vital and continuing concerns, each of which is given full scope in five sections which explore the Modernist, Political, Inner and Global dimensions of twentieth century theatre. Twentieth Century Theatre: A Sourcebook provides illuminating perspectives on past history, and throws fresh light on the sources and development of theatre today. This sourcebook is not only an essential and versatile collection for students at all levels, but also directed numerous devised shows which have toured to theatres, schools, community centres and prisons.

Indian Given María Josefina Saldaña-Portillo 2016-03-10 In *Indian Given* María Josefina Saldaña-Portillo addresses current racialized violence and resistance in Mexico and the United States with a genealogy that reaches back to the sixteenth century. Saldaña-Portillo formulates the central place of indigenous peoples in the construction of national spaces and racialized notions of citizenship, showing, for instance, how Chicanos/as in the U.S./Mexico borderlands might affirm or reject their indigenous background based on their location. In this and other ways, she demonstrates how the legacies of colonial Spain's and Britain's differing approaches to encountering indigenous peoples continue to shape perceptions of the natural, racial, and cultural landscapes of the United States and Mexico. Drawing on a mix of archival, historical, literary, and legal texts, Saldaña-Portillo shows how *los indios*/Indians provided the condition of possibility for the emergence of Mexico and the United States.

Intrinsic Motivation Edward L. Deci 2012-12-06 As I begin to write this Preface, I feel a rush of excitement. I have now finished the book; my gestalt is coming into completion. Throughout the months that I have been writing this, I have, indeed, been intrinsically motivated. Now that it is finished I feel quite competent and self-determining (see Chapter 2). Whether or not those who read the book will perceive me that way is also a concern of mine (an extrinsic one), but it is a wholly separate issue from the intrinsic rewards I have been experiencing. This book presents a theoretical perspective. It reviews an enormous amount of research which establishes unequivocally that intrinsic motivation exists. Also considered herein are various approaches to the conceptualizing of intrinsic motivation. The book concentrates on the approach which has developed out of the work of Robert White (1959), namely, that intrinsically motivated behaviors are ones which a person engages in so that he may feel competent and self-determining in relation to his environment. The book then considers the development of intrinsic motivation, how behaviors are motivated intrinsically, how they relate to and how intrinsic motivation is extrinsically motivated behaviors, affected by extrinsic rewards and controls. It also considers how changes in intrinsic motivation relate to changes in attitudes, how people attribute motivation to each other, how the attribution process is motivated, and how the process of perceiving motivation (and other internal states) in oneself relates to perceiving them in others.

***Transborder Lives* Lynn Stephen 2007-06-13** Lynn Stephen's innovative ethnography follows indigenous Mexicans from two towns in the state of Oaxaca—the Mixtec community of San Agustín Atenango and the Zapotec community of Teotitlán del Valle—who periodically leave their homes in Mexico for extended periods of work in California and Oregon. Demonstrating that the line separating Mexico and the United States is only one among the many borders that these migrants repeatedly cross (including national, regional, cultural, ethnic, and class borders and divisions), Stephen advocates an ethnographic framework focused on transborder, rather than transnational, lives. Yet she does not disregard the state: She assesses the impact migration has had on local systems of government in both Mexico and the United States as well as the abilities of states to police and affect transborder communities. Stephen weaves the personal histories and narratives of indigenous transborder migrants together with explorations of the larger structures that affect their lives. Taking into account U.S. immigration policies and the demands of both commercial agriculture and the service sectors, she chronicles how migrants experience and remember low-wage work in agriculture, landscaping, and childcare and how gender relations in Oaxaca and the United States are reconfigured by migration. She looks at the ways that racial and ethnic hierarchies inherited from the colonial era—hierarchies that debase Mexico's indigenous groups—are reproduced within heterogeneous Mexican populations in the United States. Stephen

provides case studies of four grass-roots organizations in which Mixtec migrants are involved, and she considers specific uses of digital technology by transborder communities. Ultimately Stephen demonstrates that transborder migrants are reshaping notions of territory and politics by developing creative models of governance, education, and economic development as well as ways of maintaining their cultures and languages across geographic distances.

Autism Imaging and Devices Manuel F. Casanova 2017-01-06 This book covers state-of-the-art medical image analysis approaches currently pursued in autism research. Chapters cover recent advances in diagnosis using structural neuroimaging. All aspects of imaging are included, such as electrophysiology (EEG, ERP, QEEG, and MEG), postmortem techniques, and advantages and difficulties of depositing/acquiring images in larger databases. The book incorporates 2D, 3D, and 4D imaging and advances scientific research within the broad field of autism imaging.

Eye On The Flesh Maurizia Boscagli 1996-03-21 Maurizia Boscagli takes the reader on a highly informed, literary and cultural excursion through the changing image of the male body between 1880 and 1930. This highly erudite study about our obsessions with male physical perfection undergirds and explains late twentieth century America's preoccupation with exercise, athletics, diet, and consumerism.

Rethinking Los Angeles Michael Dear 1996-08-20 The Los Angeles region is increasingly being held up as a prototype for the collective urban future of the United States. Yet it is probably the least understood, most under-studied major city in the US. Very few people beyond the boundaries of Southern California have an accurate appreciation of what the region is, who lives there, and what it does. This groundbreaking collection of essays brings together well-respected contributors to dispel the myths about Southern California and to begin the process of 'rethinking' Los Angeles.

Indianthusiasm Hartmut Lutz 2020-01-07 Indianthusiasm refers to the European fascination with, and fantasies about, Indigenous peoples of North America, and has its roots in nineteenth-century German colonial imagination. Often manifested in romanticized representations of the past, Indianthusiasm has developed into a veritable industry in Germany and other European nations: there are Western and so-called "Indian" theme parks and a German hobbyist scene that attract people of all social backgrounds and ages to join camps and clubs that practise beading, powwow dancing, and Indigenous lifestyles. Containing interviews with twelve Indigenous authors, artists, and scholars who comment on the German fascination with North American Indigenous Peoples, Indianthusiasm is the first collection to present Indigenous critiques and assessments of this phenomenon. The volume connects two disciplines and strands of scholarship: German Studies and Indigenous Studies,

focusing on how Indianthusiam has created both barriers and opportunities for Indigenous peoples with Germans and in Germany.

A Handbook for Translator Trainers Dorothy Kelly 2014-04-23 The community of translator trainers is growing constantly, as new courses are set up in diverse contexts throughout the world. After a brief overview of current approaches to translator training, this book offers practical guidance to sound training practices in different contexts. Given the very wide variety of backgrounds translator trainers come from, the text aims to be equally of use to language teachers new to translation, to professional translators new to teaching or training, to recent graduates in translation intending to embark on academic careers in translation studies, and to more experienced trainers wishing to reflect on their activity or to train new trainers. For that reason, no specific prior knowledge or experience of training is taken for granted. A systematic approach to curriculum and syllabus design is adopted, guiding readers from the writing of learning outcomes or objectives through to the design of teaching and learning activities, to the assessment of learning and course evaluation, all this applied throughout in detail to the field of translation. Chapters contain exercises and activities designed to promote reflection on practice and to help trainers to develop their teaching skills, as well as their own course material. These activities are suitable both for self-learners and for groups on trainer training and staff development courses.

Postmodern Belief Amy Hungerford 2010-07-01 How can intense religious beliefs coexist with pluralism in America today? Examining the role of the religious imagination in contemporary religious practice and in some of the best-known works of American literature from the past fifty years, *Postmodern Belief* shows how belief for its own sake--a belief absent of doctrine--has become an answer to pluralism in a secular age. Amy Hungerford reveals how imaginative literature and religious practices together allow novelists, poets, and critics to express the formal elements of language in transcendent terms, conferring upon words a religious value independent of meaning. Hungerford explores the work of major American writers, including Allen Ginsberg, Don DeLillo, Cormac McCarthy, Toni Morrison, and Marilynne Robinson, and links their unique visions to the religious worlds they touch. She illustrates how Ginsberg's chant-infused 1960s poetry echoes the tongue-speaking of Charismatic Christians, how DeLillo reimagines the novel and the Latin Mass, why McCarthy's prose imitates the Bible, and why Morrison's fiction needs the supernatural. Uncovering how literature and religion conceive of a world where religious belief can escape confrontations with other worldviews, Hungerford corrects recent efforts to discard the importance of belief in understanding religious life, and argues that belief in belief itself can transform secular reading and writing into a religious act. Honoring the ways in which people talk about and practice religion, *Postmodern Belief* highlights the claims of the religious imagination in

twentieth-century American culture.
