**Stillness and Speed** Dennis Bergkamp 2013-09-26 In Stillness and Speed, one of football's most enigmatic stars finally opens up about his life and career, revealing the things that motivate and inspire him. Viewed by many as one of the most influential figures in Premier League history, and scorer of the goal that Arsenal fans voted the best in the club's history, Dennis Bergkamp is a true giant of the game. As a youngster, Bergkamp learned from the Dutch master Johan Cruyff. By the time the pupil was ready to graduate from Ajax and move abroad, he was ready to spread the word, but in Italy he found few willing listeners. It was only when he moved to Arsenal and linked up with Arsene Wenger that he met someone else who shared his vision for football's possibilities. Bergkamp became central to everything the club did: now he had become the teacher, their creative genius, and the one who inspired some of the wayward old guard to new heights, helping them to seven major trophies. Few footballers' books make you think anew, but in Stillness and Speed Bergkamp presents a new vision for the game and how it might be played. He was a player like no other; his story is told like no other. It is a book that will inspire football fans everywhere, whatever their allegiance.

**Service Quality in Indian Hospitals** Sanjay Mohapatra 2017-10-18 This book offers an elaborate and empirical look at service quality of hospitals in the emerging market of India. The poor quality of service is a major issue in a large number of hospitals (particularly in government hospitals), which forces patients to opt for private hospitals that are generally much more expensive than government hospitals. This book provides a comprehensive understanding of service quality antecedents in Indian

hospitals. It focuses on patient satisfaction and includes valuable insights and implications for hospital management and government. The book is theoretically grounded in SERVQUAL literature and uses appropriate and sophisticated techniques and tools to analyse data. It highlights causal model development with Structural Equation Modelling (SEM) and introduces a classification model, developed using Artificial Neural Networks (ANNs), in order to benchmark specialty cardiac care. The book also deals with Support Vector Machines (SVMs) and compares the error rates between SVM and ANN to find the best classification technique among the two. Overall, this book is a timely and relevant work that contributes to the theory, practice and policy of service quality in hospitals.
