Handwriting Pocketbook Julie Bennett 2015-09-16 Whether you're teaching novice writers, older children or adults, you'll benefit from Julie Bennett's enthusiasm and expertise. She presents handwriting as both an art and a science. Either way, it can be mastered. Julie covers all bases: teaching, improving and troubleshooting handwriting. Starting with the basics - seating, posture, paper and writing implements - she then fixes the goalposts with a handwriting checklist. This is the reference point for remedying a range of common problems (e.g. uneven spacing between words and letters or inconsistent slope and slant) using Julie's multi-sensory 'Key Notes' method. A chapter on teaching beginner writers moves through the stages of writing from pre-literate to fluency, and a section on solving handwriting problems (e.g. for left-handers or those with dysgraphia or arthritis) is followed by a treasure trove of resources: schemes, aids, software, websites and books. Kissing in Cars Sara Ney 2017-03-28 WILL SHE, OR WON'T SHE... Studious and (mostly) sensible, the only thing Molly Wakefield wants to do is get through Senior Year and graduate. Well, that and hit the beach in her spare time. Okay, fine - and go shopping every once in a while for a new dress... (and who could blame her?) And things are going according to plan - until the day she spies Weston McGrath, handsome star athlete and scholar, spying on her in study hall. A tad creepy? Maybe. Thrilling? Absolutely. You see, Weston McGrath happens to be one guy no one can get close to. Despite her best efforts to avoid it (because let's face it - the guy isn't exactly "boyfriend material") Molly and Weston form a friendship. And more.... Sort of. But it's a friendship that comes with a price - because Weston just cannot seem to stop screwing things up. Or saying all the wrong things. Possibly in that order... And who has time for an 18 year old "fixer-upper" that should know better? Not Molly. Or does she?

Up to 20% of children have dyslexia. Few receive the individualized teaching they need from their schools. To help parents and teachers who want to teach their children using an evidence-based, effective method, Pamela Brookes, the mother of a child with dyslexia, discusses their daily routine as she teaches her daughter to read using the decodable DOG ON A LOG Books series. As the author of DOG ON A LOG Books, Pamela also shares how to choose where in the series to start. She shares how she teaches each of the phonics rules used in the book series along with the reasons for teaching the syllable types and handwriting. Although this booklet is meant to guide parents and teachers using DOG ON A LOG Books, the information can be adapted and applied to any systematic series of decodable books. How to Use Decodable Books to Teach Reading is edited by Dr. Nancy Mather, a professor in learning disabilities, reading, and writing to make sure it follows the scientific research on teaching reading. This edition includes information on Steps 1 to 10 of the DOG ON A LOG phonics rules. Additional steps will be added as the future decodable chapter books are created.
