Kansei Innovation Mitsuo Nagamachi 2015-02-02 Developed in the early 70s in Japan, the Kansei Engineering (KE) method gives you the tools to develop profitable and well-received products and services. Written by the founder of KE, MitsuoNagamachi, and co-authored by one of his proteges, Anitawati Mohd Lokman, Kansei Innovation: Practical Design Applications for Product and Service Development shows you how to nurture Kansei, develop the skill in observing people, and apply that skill to the development and design of products. In this book, Nagamachi shares his 50 years of experiences in enterprise guidance and product development, including examples of exceptional service innovation at companies such as Nissan Motor, Mazda, Toyota, Volvo, Fuji Heavy Industries, Mitsubishi Electric, Tenmaya Department Stores, Seibu Department Stores, Suntory, NEC, Sharp, Komatsu, Wacoal Corporation, Matsushita Electric Works (now Panasonic Electric Works), Boeing, and many more. These stories may surprise you when you learn about the new development of certain products that you already use. The book includes coverage of ergonomic and KE methods for studying human Kansei in product development and job improvement as well as discussion of how to use these methods for innovation in work improvement and activate KE for product development. It gives you a reliable instrument for predicting the reception of a product on the market before the development costs become too large. And, in the end, you will understand how Kansei—a seemingly dubious presence—is processed scientifically and able to have multilateral applications.

Moody's Industrial Manual 1997 Covering New York, American & regional stock exchanges & international companies.

Decisions and Orders of the National Labor Relations Board United States. National Labor Relations Board 2006

Industrial Innovation in China Zhenyu Fu 2021-09-30 This book, based on extensive original research, examines the factors which lead to successful innovation in Chinese industry. Considering the large and important Chinese mining industry in detail, it argues that innovation is key for success in all industries, not just new "tech" industries. It reveals how the interaction of universities, governments and industries is highly significant, considers how some parts of the industry, such as the mining and mineral processing stages, are more innovative than other stages, such as prospecting and mining equipment manufacturing, and suggests that this is explained both by the distance between final products and the market and commercialisation, and by the intensity of the interaction between the industrial company and the university or research institute. Throughout, the book includes examples and case studies to highlight the points made.

*Women of Faith and the Quest for Spiritual Authenticity Sara Ashencaen Crabtree 2021-02-01 Drawn from over fifty-eight individual, in-depth, qualitative interviews with women of faith in Malaysia and Britain, Women of Faith and the Quest for Spiritual Authenticity is a multifaith, multicultural and cross-cultural comparative focus that explores women's religious expressions, as derived from practising Buddhists, Hindus, Christians, Muslims, Jews, Wiccans and Druids among others. Despite social advances towards women's emancipation and the lacerating critiques from feminist theologians across the Abrahamic religions and beyond, women's religious experiences remain submerged beneath the weight of patriarchal religious leadership and ongoing masculinised, dogmatic interpretations. Even feminism itself has yet to move the spiritual onto their main agenda of inequity in women's lives. This extensive, feminist research monograph challenges these exclusions to centre and amplify women's voices in speaking powerfully of their religious experiences, interpretations and practices. This is an ecumenical and entertaining ethnography where women's narratives and life stories ground faith as embodied, personal, painful, vibrant, diverse, illuminating and shared. This book will of interest not only to academics and students of the sociology of religion, feminist and gender studies, politics, ethnicity and Southeast Asian studies, but is equally accessible to the general reader broadly interested in faith and feminism.*
