**China's Influence and American Interests** Larry Diamond 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is

time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

Lee Cooper offers a kaleidoscopic portrait of contemporary American society as it has been captured and transmitted in the lyrics of more than 3,000 popular recordings. By tracing the permutations of American popular music from the end of the Big Band/Swing Era through the Age of Rock, the author presents a

thematically structured analysis of popular music lyrics from 1950 through 1985. Cooper divides his lucid commentaries and lists of songs into fifteen sections, each dealing with a particular social, political, or personal theme. In the brief essays that precede the lengthy discographic sections, the author explores the ways in which popular music has dealt with such issues as religion, death, education, youth culture, transportation, mass media, protest, military activity, women's liberation, and drug use and abuse. An illustrative discography of 45 r.p.m. records follows each section of commentary. An extensive bibliography of books, articles, and special reports appears at the end of the volume, along with a selected discography of album-length recordings which supplements the extensive 45 r.p.m. listings.

**Applied Software Architecture** Christine Hofmeister 2000 "Designing a large software system is an extremely complicated undertaking that requires juggling differing perspectives and differing goals, and evaluating differing options. Applied Software Architecture is the best book yet that gives guidance as to how to sort out and organize the conflicting pressures and produce a successful design." -- Len Bass, author of *Software Architecture in Practice*. Quality software architecture design has always been important, but in today's fast-paced, rapidly changing, and complex development environment, it is essential. A solid, well-thought-out design helps to manage complexity, to resolve trade-offs among conflicting requirements, and, in general, to bring quality software to market in a more timely fashion. Applied Software Architecture provides practical guidelines and techniques for producing quality software designs. It gives an overview of software architecture basics and a detailed guide to architecture design tasks, focusing on four fundamental views of architecture--conceptual, module, execution, and code. Through four real-life case studies, this book reveals the insights and best practices of the most skilled software architects in designing software architecture. These case studies, written with the masters who created them, demonstrate how the book's concepts and techniques are embodied in state-of-the-art architecture design. You will learn how to: create designs flexible enough to incorporate tomorrow's technology; use architecture as the basis for meeting performance, modifiability, reliability, and safety requirements; determine priorities among conflicting requirements and arrive

at a successful solution; and use software architecture to help integrate system components. Anyone involved in software architecture will find this book a valuable compendium of best practices and an insightful look at the critical role of architecture in software development. 0201325713B07092001

Microcomputer Applications to the Military Construction--Army (MCA) Process: Concepts for Implementation at Army Corps of Engineers Construction Field Offices  
1981 The objectives of this report are (1) to assess the potential usefulness of microcomputer technology as a tool for project management at Corps of Engineers construction field offices, and (2) to present methods of effectively transferring that technology to field agencies. This report offers an overview of the construction management activities and the expected field office workload for military construction and civil works construction projects. In addition, the report describes the capabilities offered by microcomputer systems and the technology to be considered in acquiring these systems. The expected costs and benefits of the computer hardware and software are explained. Finally, approaches for extending this technology to the field are analyzed. This report concludes that microcomputer systems make more efficient (1) updating network progress and pay, (2) analyzing contract modifications, and (3) handling general data. Microcomputer technology can be effectively transferred to the field by: (1) development of the system documentation required by Army Regulation 18-1; (2) coordination with Corps district and field offices; (3) allocation of funds and resources for extension to the field; (4) classification of the system as a class IV system; (5) selection of an assigned responsible agency to maintain the system; and (6) cooperation among agencies involved in development and operation of the system. **Doing Business 2017** World Bank 2016-10-25 Fourteenth in a series of annual reports comparing business regulation in 190 economies, Doing Business 2017 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. This year's report introduces major improvements by expanding the paying taxes indicators to cover postfiling processes—tax audits, tax refunds and tax appeals—and presents analysis of pilot data on selling to the government which measures public procurement regulations. Also for the first time this year Doing Business collects data on Somalia, bringing the total number of economies covered to 190. Using the data originally developed by Women, Business and the Law, this year for the first time Doing Business adds a gender component to three indicators—starting a business, registering property, and enforcing contracts—and finds that those economies which limit women's access in these areas have fewer women working in the private sector both as employers and employees. The report updates all indicators as of June 1, 2016, ranks economies on their overall "ease of doing business", and analyzes reforms to business regulation "identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182

articles in peer-reviewed academic journals since its inception.
