Got It!, Level 2 Claire Thacker 2010-11-04 Got it! is a course which is comprehensive and innovative in its range of resources, but also offers support and flexibility for the teacher. How does it achieve this? By presenting grammar through dialogues or texts and following up with more detailed analysis, students are able to check their understanding of meaning and context. They are encouraged to try out new structures and are given opportunities to explore the meaning and usage of new language before it is presented and practised more formally. This allows them to discover the language intuitively for themselves and this sense of achievement helps to motivate them. With a strong emphasis on dialogue work and personalization, students are able to understand how the language can work for them. Targeted skills lessons develop this and build their competence further. The outstanding range of components means that every lesson can be varied and exciting. Whether you prefer using print or digital, or a combination of the two, all the resources are at your fingertips - giving you maximum support and flexibility. Maintaining motivation is always a challenge with teenagers, so the topics for each unit have been carefully chosen to help them become culturally aware. In addition, the broad range of issues covered develops their understanding of values.

2-Dimensional Categories Niles Johnson 2021-01-31 Category theory emerged in the 1940s in the work of Samuel Eilenberg and Saunders Mac Lane. It describes relationships between mathematical structures. Outside of pure mathematics, category theory is an important tool in physics, computer science, linguistics, and a quickly-growing list of other sciences. This book is about 2-dimensional categories, which add an extra dimension of richness and complexity to category theory. 2-Dimensional Categories is an introduction to 2-categories and bicategories, assuming only the most elementary aspects of category theory. A review of basic category theory is followed by a systematic discussion of 2-/bicategories, pasting diagrams, lax functors, 2-/bilimits, the Duskin nerve, 2-nerve, internal adjunctions, monads in bicategories, 2-monads, biequivalences, the Bicategorical Yoneda Lemma, and the Coherence Theorem for bicategories. Grothendieck fibrations and the Grothendieck construction are discussed next, followed by tricategories, monoidal bicategories, the Gray tensor product, and double categories. Completely detailed proofs of several fundamental but hard-to-find results are presented for the first time. With exercises and plenty of motivation and explanation, this book is useful for both beginners and experts.

The Oxford American Book of Great Music Writing Marc Smirnoff 2012-01-01 Not only have a breathtaking array of musical giants come from the South—think Elvis Presley, Robert Johnson, Louis Armstrong, Jimmie Rodgers, to name just obvious examples—but so have a breathtaking array of American music genres. From blues to rock & roll to jazz to country to bluegrass—and areas in between—it all started in the American South. Since its debut in 1996, The Oxford American's more-or-less annual Southern Music Issue has become legendary for its passionate and wide-ranging approach to music and for working with some of America's greatest writers. These writers—from Peter Guralnick to Nick Tosches to Susan Straight to William Gay—probe the lives and legacies of Southern musicians you may or may not yet be familiar with, but whom you'll love being introduced, or reintroduced, to. In one creative, fresh way or another, these writers also uncover the essence of music—and why music has such power over us. To celebrate ten years of Southern music issues, most of which are sold-out or very hard to find, the fifty-five essays collected in this dynamic, wide-ranging, and vast anthology appeal to both music fans and fans of great writing.

Doomsday Book Connie Willis 1993-08-01 "A tour de force."—The New York Times Book Review Connie Willis draws upon her understanding of the universalities of human nature to explore the ageless issues of evil, suffering, and the indomitable will of the human spirit. For Kivrin, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin—barely of age herself—finds she has become an unlikely angel of hope during one of history's darkest hours.
