The Happy Kid Handbook Katie Hurley 2015-10-20 With all the parenting information out there and the constant pressure to be the "perfect" parent, it seems as if many parents have lost track of one very important piece of the parenting puzzle: raising happy kids. Parenting today has gotten far too complicated. It's never been the easiest job in the world, but with all the "parenting advice" parents are met with at every corner, it's hard not to become bewildered. It seems that in the past it was a good deal simpler. You made sure there was dinner on the table and the kids got to school on time and no one set anything on fire, and you called it a success. But today everybody has a different method for dealing with the madness—attachment parenting, free-range parenting, mindful parenting. And who is to say one is more right or better than another? How do you choose? The truth is that whatever drumbeat you march to, all parents would agree that we just want our kids to be happy. It seems like a no-brainer, right? But in the face of all the many parenting theories out there, happiness feels like it has become incidental. That's where *The Happy Kid Handbook* by child and adolescent psychotherapist and parenting expert Katie Hurley comes in. She shows parents how happiness is the key to raising confident, capable children. It's not about giving in every time your child wants something so they won't feel bad when you say no, or making sure that they're taking that art class, and the ballet class, and the soccer class (to help with their creativity and their coordination and all that excess energy). Happiness is about parenting the individual, because not every child is the same, and not every child will respond to parenting the same way. By exploring the differences among introverts, extroverts, and everything in between, this definitive guide to parenting offers parents the specific strategies they need to meet their child exactly where he or she needs to be met from a social-emotional perspective. A back-to-basics guide to parenting, *The Happy Kid Handbook* is a must-have for any parent hoping to be the best parent they can be.

Thrivers are different: they flourish in our fast-paced, digital-driven, often uncertain world. Why? The even better news: these traits can be taught to children at any age...in fact, parents and educators must do so. In *Thrivers*, Dr. Borba offers practical, actionable ways to develop these traits in children from preschool through high school, showing how to teach kids how to cope today so they can thrive tomorrow.

How to Raise Kids Who Aren't Assholes Melinda Wenner Moyer 2022-06-21 How to Raise Kids Who Aren't Assholes is a clear, actionable, sometimes humorous (but always science-based) guide for parents on how to shape their kids into honest, kind, generous, confident, independent, and resilient people...who just might save the world one day. As an award-winning science journalist, Melinda Wenner Moyer was regularly asked to investigate and address all kinds of parenting questions: how to potty train, when and whether to get vaccines, and how to help kids sleep through the night. But as Melinda's children grew, she found that one huge area was ignored in the realm of parenting advice: how do we make sure our kids don't grow up to be assholes? On social media, in the news, and from the highest levels of government, kids are increasingly getting the message that being selfish, obnoxious and cruel is okay. Hate crimes among children and teens are rising, while compassion among teens has been dropping. We know, of course, that young people have the capacity for great empathy, resilience, and action, and we all want to bring up kids who will help build a better tomorrow. But how do we actually do this? How do we raise children who are kind, considerate, and ethical inside and outside the home, who will grow into adults committed to making the world a better place? How to Raise Kids Who Aren't Assholes is a deeply researched, evidence-based primer that provides a fresh, often surprising perspective on parenting issues, from toddlerhood through the teenage years. First, Melinda outlines the traits we want our children to possess—including honesty, generosity, and antiracism—and then she provides scientifically-based strategies that will help parents instill those characteristics in their kids. Learn how to raise the kind of kids you actually want to hang out with—and who just might save the world.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Brain-Body Parenting Mona Delahooke 2022-03-15 NATIONAL BESTSELLER From a leading child psychologist comes this groundbreaking new understanding of children's behavior, offering insight and strategies to support both parents and children. Nominated for Malcolm Gladwell, Susan Cain, Adam Grant, and Daniel H. Pink's Next Big Idea Club Over her decades as a clinical psychologist, Dr. Mona Delahooke has routinely counseled distraught parents who struggle to manage their children's challenging, sometimes oppositional behaviors. These families are understandably focused on correcting or improving a child's lack of compliance, emotional outbursts, tantrums, and other "out of control" behavior. But, as she has shared with these families, a perspective shift is needed. Behavior, no matter how challenging, is not the problem but a symptom; a clue about what is happening in a child's unique physiologic makeup. In Brain-Body Parenting, Dr. Delahooke offers a radical new approach to parenting based on her clinical experience as well as the most recent research in neuroscience and child psychology. Instead of a "top-down" approach to behavior that focuses on the thinking brain, she calls for a "bottom-up" approach that considers the essential role of the entire nervous system, which produces children's feelings and behaviors. When we begin to understand the biology beneath the behavior, suggests Dr. Delahooke, we give our children the resources they need to grow and thrive—and we give ourselves the gift of a happier, more connected relationship with them. Brain-Body Parenting empowers parents with tools to help their children develop self-regulation skills while also encouraging parental self-care, which is crucial for parents to have the capacity to provide the essential "co-regulation" children need. When parents shift from trying to secure compliance to supporting connection and balance in the body and mind, they unlock a deeper understanding of their child, encouraging calmer behavior, more harmonious family dynamics, and increased resilience.
