Neonatal and Pediatric Respiratory Care - E-Book Brian K. Walsh 2022-11-12 Master the principles and skills of respiratory care for neonates, infants, and children! Neonatal and Pediatric Respiratory Care, 6th Edition provides a solid foundation in the assessment and treatment of respiratory disorders in children. Clear, full-color coverage simplifies the concepts of respiratory care while emphasizing clinical application. Reflecting the changing face of this profession, this edition unpacks care strategies with coverage of the newest treatment algorithms, interventions, mechanical ventilation technologies, and more. From an expert team of contributors led by Brian K. Walsh, an experienced respiratory therapist and researcher, this text is an excellent study tool for the NBRC's Neonatal/Pediatric Specialty examination. Authoritative, evidence-based content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application, with an emphasis on an entry-level BS degree. Nearly 500 full-color illustrations — plus clear tables and graphs — make it easier to understand key concepts. Case studies include a brief patient history and questions for each, showing how concepts apply to the more difficult areas of care for neonatal and pediatric disorders. Complete test preparation is provided through coverage of all the content in the matrix for the 2020 NBRC neonatal/pediatric specialty (NPS) credentialing exam. Learning Objectives at the beginning of each chapter break down key content into measurable behaviors, criteria, and conditions. Key Points at the end of each chapter summarize the more important information in a bulleted format. Assessment Questions at the end of each chapter are written in the NBRC multiple-choice style as found on the Neonatal/Pediatric Specialty (NPS) exam, helping you become familiar with the NBRC testing format. Glossary makes it easy to find definitions of all of the book's key terminology. Answers to assessment and case study questions are provided on the Evolve website. NEW! Logical, easy-to-use organization divides the content into three sections of 1) Neonatal, 2) Pediatrics, and 3) Neonatal and Pediatric combined, mirroring the academic approach of most respiratory care programs. NEW! Updated content reflects the new matrix for the 2020 NBRC Neonatal/Pediatric Specialty (NPS) exam. NEW! Assessment Questions at the end of each chapter are updated to reflect the changes to the 2020 NBRC exam. NEW! Additional treatment algorithms of care are added to relevant chapters.

Implementing an Inpatient Smoking Cessation Program Patricia M. Smith 2013-06-17 Implementing an Inpatient Smoking Cessation Program serves as a step-by-step manual for implementing a cost-effective tobacco cessation program for hospitalized patients. Based on the Staying Free program, which has evidenced among the highest cessation rates reported in the scientific literature, this book is the result of decades of research by the authors. Although the book reviews a tobacco cessation program, the process is applicable to most behavioral interventions in acute- or long-term care settings. The book details the administrative responsibilities involved in designing, implementing, delivering, evaluating, and maintaining an inpatient tobacco cessation program. Its how-to approach focuses on the skills needed to: determine the work that needs to be done, select the appropriate interventions and providers, pay for and market the program, and create systems to keep the program alive. It provides algorithms for forecasting program enrollment and information on how to budget the program. Readers can then use this information as a blueprint for implementing their own program. A chapter on workflow provides a "virtual tour" of what to expect from the first 48 hours through the first year. Written in an accessible style with insightful interviews with actual providers, Implementing an Inpatient Smoking Cessation Program: *summarizes the literature on tobacco use, including the causal health effects and cost-effectiveness of cessation programs, to help readers build a case for a program; *reviews the clinical guidelines and advantages that support an inpatient program; and *provides tips on how to develop an effective program including insight into where the bottlenecks are likely to occur, and how to avoid them. Implementing an Inpatient Smoking Cessation Program is intended for health care administrators, providers, researchers, educators, and students in health care administration, public health, community and health psychology, (behavioral) medicine, nursing, respiratory therapy, and rehabilitation.

Documentation and Reimbursement for Speech-Language Pathologists Nancy B. Swigert 2017-12-15 Although it is the least noticed by patients, effective documentation is one of the most critical skills that speech-language pathologists must learn. With that in mind, Documentation and Reimbursement for Speech-Language Pathologists: Principles and Practice provides a comprehensive guide to documentation, coding, and reimbursement across all work settings. The text begins with section 1 covering the importance of documentation and the basic rules, both ethical and legal, followed by an exploration of the various documentation forms and formats. Also included are tips on how to use electronic health records, as well as different coding systems for diagnosis and for procedures, with an emphasis on the link between coding, reimbursement, and the documentation to support reimbursement. Section 2 explains the importance of focusing on function in patient-centered care with the ICF as the conceptual model, then goes on to cover each of the types of services speech-language pathologists provide: evaluation, treatment planning, therapy, and discharge planning. Multiple examples of forms and formats are given for each. In section 3, Nancy Swigert and her expert team of contributors dedicate each chapter to a work setting in which speech-language pathologists might work, whether adult or pediatric, because each setting has its own set of documentation and reimbursement challenges. And since client documentation is not the only kind of writing done by speech-language pathologists, a separate chapter on "other professional writing" includes information on how to write correspondence, avoid common mistakes, and even prepare effective PowerPoint presentations. Each chapter in Documentation and Reimbursement for Speech-Language Pathologists contains activities to apply information learned in that chapter as well as review questions for students to test their knowledge. Customizable samples of many types of forms and reports are also available. Instructors in educational settings can visit www.efacultyounge.com for additional material to be used for teaching in the classroom. Documentation and Reimbursement for Speech-Language Pathologists: Principles and Practice is the perfect text for speech-language pathology students to learn these vital skills, but it will also provide clinical supervisors, new clinicians, and speech-language pathologists starting a private practice or managing a department with essential information about documentation, coding, and reimbursement.

Improving Outcomes with Clinical Decision Support Jerome. A Osheroff 2021-02-28 Winner of the 2012 HIMSS Book of the Year Award! Co-published by HIMSS, the Scottsdale Institute, AMIA, AMDIS and SHM, this second edition of the authoritative guide to CDS implementation has been substantially enhanced with expanded and updated guidance on using CDS interventions to improve care delivery and outcomes. This edition has been reorganized into parts that help readers set up (or refine) a successful CDS program in a hospital, health system or physician practice; and configure and launch specific CDS interventions. Two detailed case studies illustrate how a "real-life" CDS program and specific CDS interventions might evolve in a hypothetical community hospital and small physician practice. This updated edition includes enhanced worksheets--with sample data--that help readers to document and use information needed for their CDS program and interventions. Sections in each chapter present considerations for health IT software suppliers to effectively support their CDS implementer clients.

Emergency Department Compliance Manual, 2016 Edition Ginsberg, Martin, Kelley 2016-03-18 Emergency Department Compliance Manual, 2016 Edition provides everything you need to stay in compliance with complex emergency department regulations. The list of questions helps you quickly locate specific guidance on difficult legal areas such as: Complying with COBRA Dealing with psychiatric patients Negotiating consent requirements Obtaining reimbursement for ED services Avoiding employment law problems Emergency Department Compliance Manual also features first-hand advice from staff members at hospitals that have recently navigated a Joint Commission survey and includes frank and detailed information. Organized by topic, it allows you to readily compare the experiences of different hospitals. Because of the Joint Commission's hospital-wide, function-based approach to evaluating compliance, it's been difficult to know specifically what's expected of you in the ED. Emergency Department Compliance Manual includes a concise grid outlining the most recent Joint Commission standards which will help you learn what responsibilities you have for demonstrating compliance. Plus, Emergency Department Compliance Manual includes sample documentation that hospitals across the country have used to show compliance with legal requirements and Joint Commission standards: Age-related competencies Patient assessment policies and procedures Consent forms Advance directives Policies and protocols Roles and responsibilities of ED staff Quality improvement tools Conscious sedation policies and procedures Triage, referral, and discharge policies and procedures And much more!

Mechanics of Breathing Andrea Aliverti 2014-06-19 This book offers a state-of-the-art description of the complexity of the healthy and pathological respiratory system, with particular reference to the mechanics of the airways, lung and chest wall. Detailed information is provided on new insights into the mechanics of breathing that have been obtained through technological innovations in measurement systems, cutting-edge modeling techniques and novel approaches to functional imaging of the respiratory system. It is explained how these advances permit the assessment of emerging treatment approaches, including new drugs, innovative surgical techniques and modes of mechanical ventilation and new forms of rehabilitation. In order to ensure comprehensive coverage of the subject, the editor has assembled a multidisciplinary team of authors comprising basic scientists in respiratory medicine, chest and intensive care physicians and bioengineers involved in both modeling and instrumentation. The book is intended for intensive care physicians, respirologists, physiologists, rehabilitation specialists, basic scientists in respiration, research and clinical fellows, biomedical engineers involved with respiratory mechanics and respiratory therapists. They will update their knowledge and improve their clinical expertise.

Nightshift in the Er Margaret Mayotte-Hirn 2011-05-20 Born in a small town in Upper Peninsula of Michigan, Lake Linden, Margaret Mayotte-Hirn grew up experiencing her life to the fullest. Today, she can look back and remember and be glad she experienced all those things that made her who she is today. She worked full-time in hospitals for 48 years and began writing when she was in her 60s. She raised three children, got a divorce, remarried, and enjoyed three new children in her life. She also gardened, raised Arabian horses and showed them, played softball since she was 26, and volunteered in her spare time. It didnt leave much time for serious writing, but the desire was there. Leaving full-time hospital work did give her more time to do more. She volunteered and was selected Volunteer of the Year for 2 different organizations. She traveled states-wide to play softball in tournaments. She was an advocate for senior action and exercise. At age 70, she underwent bilateral knee replacements which slowed her down for a little while. Determined to return to former activity, she dove into therapy. Within 6 months, she regained all her mobility and resumed all her activities. During her slowedown time, she thought about publishing the 2 books she had written in past years. With that taking place, who knows maybe her next passion will be writing. Inquisitive, daring thoughtful, caring and looks at life in a simple straight-forward way and addresses its challenges. These attributes are refl ected in her writing.
