The Postman David Brin 2011-04-06 NOW A MAJOR MOTION PICTURE • “A moving experience . . . a powerful cautionary tale.”—Whitley Strieber He was a survivor—a wanderer who traded tales for food and shelter in the dark and savage aftermath of a devastating war. Fate touches him one chill winter’s day when he borrows the jacket of a long-dead postal worker to protect himself from the cold. The old, worn uniform still has power as a symbol of hope, and with it he begins to weave his greatest tale, of a nation on the road to recovery. This is the story of a lie that became the most powerful kind of truth. A timeless novel as urgently compelling as War Day or Alas, Babylon, David Brin’s The Postman is the dramatically moving saga of a man who rekindled the spirit of America through the power of a dream, from a modern master of science fiction. “The Postman will keep you engrossed until you’ve finished the last page.”—Chicago Tribune

He wasn't. He now has a passenger in his brain—an ancient alien life-form called Tao, whose race crash-landed on Earth before the first fish crawled out of the oceans. Now split into two opposing factions—the peace-loving, but under-represented Prophus, and the savage, powerful Genjix—the aliens have been in a state of civil war for centuries. Both sides are searching for a way off-planet, and the Genjix will sacrifice the entire human race, if that's what it takes. Meanwhile, Roen is having to train to be the ultimate secret agent. Like that's going to end up well.

The Best Time Travel Stories of the 20th Century Harry Turtledove 2004-12-28 LEAP INTO THE FUTURE, AND SHOOT BACK TO THE PAST H. G. Wells's seminal short story “The Time Machine,” published in 1895, provided the springboard for modern science fiction's time travel explosion. Responding to their own fascination with the subject, the greatest visionary writers of the twentieth century penned some of their finest stories. Here are eighteen of the most exciting tales ever told, including “Time's Arrow” In Arthur C. Clarke's classic, two brilliant physicists finally crack the mystery of time travel—with appalling consequences. “Death Ship” Richard Matheson, author of *Somewhere in Time*, unveils a chilling scenario concerning three astronauts who stumble upon the conundrum of past and future. “Yesterday was Monday” If all the world's a stage, Theodore Sturgeon's compelling tale follows the odyssey of an ordinary joe who winds up backstage. “Rainbird” R.A. Lafferty reflects on what might have been in this brainteaser about an inventor so brilliant that he invents himself right out of existence. “Timetipping” What if everyone time-traveled except you? Jack Dann provides some surprising answers in this literary gem. . . . as well as stories by Poul Anderson • L. Sprague de Camp • Joe Haldeman • John Kessel • Nancy Kress • Henry Kuttner • Ursula K. Le Guin • Larry Niven • Charles Sheffield • Robert Silverberg • Connie Willis By turns frightening, puzzling, and fantastic, these stories engage us in situations that may one day break free of the bonds of fantasy . . . to enter the realm of the future: our future. Note: “A Sound of Thunder” by Ray Bradbury and “I'm Scared” by Jack Finney are not included in this edition.

Invisible Things Mat Johnson 2022-06-28 A sharp allegorical novel about a hidden human civilization, a crucial election, and a mysterious invisible force that must not be named, by one of our most imaginative comic novelists **ONE OF THE BEST BOOKS OF THE YEAR: The Washington Post** When sociologist Nalini Jackson joins the SS Delany for the first manned mission to Jupiter, all she wants is a career opportunity: the chance to conduct the first field study of group dynamics on long-haul cryoships. But what she discovers instead is an entire city encased in a bubble on Europa, Jupiter's largest moon. Even more unexpected, Nalini and the rest of the crew soon find themselves abducted and joining its captive population, forced to start new lives in a place called New Roanoke. New Roanoke is a city riven by wealth inequality and governed by a feckless, predatory elite, its economy run on heedless consumption and income inequality. But in other ways it's different from the cities we already know: it's covered by an enormous dome, it's populated by alien abductees, and it happens to be terrorized by an invisible entity so disturbing that no one even dares acknowledge its existence. Albuquerque chauffeur Chase Eubanks is pretty darn sure aliens stole his wife. People mock him for saying that, but he doesn't care who knows it. So when his philanthropist boss funds a top-secret rescue mission to save New Roanoke's abductees, Chase jumps at the chance to find her. The plan: Get the astronauts out and provide the population with the tech they need to escape this alien world. The reality: Nothing is ever simple when dealing with the complex, contradictory, and contrarian impulses of everyday earthlings. This is a madcap, surreal adventure into a Jovian mirror world, one grappling with the same polarized politics, existential crises, and mass denialism that obsess and divide our own. Will New Roanoke survive? Will we?

Tomorrow's Parties Jonathan Strahan 2022-08-23 Twelve visions of living in a climate-changed world. We are living in the Anthropocene—an era of dramatic and violent climate change featuring warming oceans, melting icecaps, extreme weather events, habitat loss, species extinction, and more. What will life be like in a climate-changed world? In **Tomorrow's Parties**, science fiction authors speculate how we might be able to live and even thrive through the advancing Anthropocene. In ten original stories by writers from around the world, an interview with celebrated writer Kim Stanley Robinson, and a series of intricate and elegant artworks by Sean Bodley, **Tomorrow's Parties** takes rational optimism as a moral imperative, or at least a pragmatic alternative to despair. In these stories—by writers from the United Kingdom, the United States, Nigeria, China, Bangladesh, and Australia—a young man steals from delivery drones; a political community lives on an island made of ocean-borne plastic waste; and a climate change denier tries to unmask “crisis actors.” Climate-changed life also has its pleasures and epiphanies, as when a father in Africa works to make his son's dreams of “Viking adventure” a reality, and an IT professional dispatched to a distant village encounters a marvelous predigital fungal network. Contributors include Pascall Prize for Criticism winner James Bradley, Hugo Award winners Greg Egan and Sarah Gailey, Philip K Dick Award winner

Meg Elison, and New York Times bestselling author Daryl Gregory.

Terminal Uprising Jim C. Hines 2020-01-28 Human civilization didn't just fall. It was pushed. The Krakau came to Earth in the year 2104. By 2105, humanity had been reduced to shambling, feral monsters. In the Krakau's defense, it was an accident, and a century later, they did come back and try to fix us. Sort of. It's been four months since Marion "Mops" Adamopoulos learned the truth of that accident. Four months since she and her team of hygiene and sanitation specialists stole the EMCS Pufferfish and stopped a bioterrorism attack against the Krakau homeworld. Four months since she set out to find proof of what really happened on Earth all those years ago. Between trying to protect their secrets and fighting the xenocidal Prodryans, who've been escalating their war against everyone who isn't Prodryan, the Krakau have their tentacles full. Mops' mission changes when she learns of a secret Krakau laboratory on Earth. A small group under command of Fleet Admiral Belle-Bonne Sage is working to create a new weapon, one that could bring victory over the Prodryans ... or drown the galaxy in chaos. To discover the truth, Mops and her rogue cleaning crew will have to do the one thing she fears most: return to Earth, a world overrun by feral apes, wild dogs, savage humans, and worse. (After all, the planet hasn't been cleaned in a century and a half!) What Mops finds in the filthy ruins of humanity could change everything, assuming she survives long enough to share it. Perhaps humanity isn't as dead as the galaxy thought.
