The DASH Diet Action Plan Marla Heller 2007 The DASH Diet Action Plan is the user-friendly teaching guide to the DASH diet. Initially, many people find it difficult to follow the DASH diet. This book makes it simple to understand and put into practice. The book makes it easy to lose weight with the DASH diet, and it has realistic ways to add exercise. Although the book was not intended to be an aggressive weight loss book, people are writing to say that they have

surprised themselves by finding it easy to lose weight following the plan! Many people find the DASH diet to be hard to implement and sustain in a hectic lifestyle. The average American gets 2 - 3 servings of fruits and vegetables combined each day, so following the DASH diet may seem daunting. The DASH Diet Action Plan book is designed to help you with more than just "what" is involved with the DASH diet, it also shows you "how." How to follow the DASH diet in restaurants, how to lose weight, how to make over your kitchen to make it easy to follow your plan, how to fit in exercise, how to reduce salt intake, how to add vegetables even if you "hate" vegetables. And the book helps you make your own personal plan with specific steps you will take to fit the DASH diet into your daily routine. Our readers say that this is the best DASH diet book! Your step-by-step plan will include: setting your goals for blood pressure and cholesterol, determining the calorie-level you need for maintenance or weight loss, developing meal plans, developing a realistic exercise plan, adjusting the DASH diet to accommodate other health problems, choosing the key DASH diet foods, reading food labels, and learning how to incorporate more vegetables in your diet, and setting up your kitchen to make it easy to stay on track. This book was written by a registered dietitian who is experienced in helping people make sustainable behavior changes, and make healthy eating part of their real lives. She knows that people need flexibility and options to choose different approaches, since not everyone has the time or the interest in cooking or making drastic changes in how they eat. The book incorporates tools that will help you plan the specific steps you will take to adopt the DASH diet. Research shows that people who make concrete plans are more likely to be successful with adopting new health behavior. This should improve your ability to lower your blood pressure (and cholesterol), without medication.

Your Guide to Lowering Your Blood Pressure with DashU. S. Department Human Services 2012-07-09 This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount

recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat--about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.
