The Secret Life of Freddie Mills Michael Litchfield 2017-09 Seven young women, all murdered in the most disgusting manner imaginable. Unimaginable, in fact: a first of its kind, and never before explicitly revealed. All the victims were prostitutes. All were dumped naked after having been stored by their killer as sex toys. Some of them were mothers. Each was someone's daughter. And for more than fifty years the author has lived with the haunting secret that he was once suspected by Scotland Yard of being a serial killer more depraved and dangerous than Jack the Ripper. In the killing spree that lasted more than a year, the author had a mole deep inside Scotland Yard's Murder Squad, similar to "Deep Throat" of Watergate scandal, who was drip-feeding him the step-by-step plays to snare the monster who brought terror to the streets of West London. Hundreds of police women, posing as prostitutes, flooded the red-light districts, hoping to be selected by the killer - more hopeful, though, that the back-up would swoop to the rescue in time. At one point, Scotland Yard feared that a prostitute, missing for more than a fortnight, had become the eighth victim and appealed to the public for help. It took the author just eleven hours to track her down and hand her alive and well to the Murder Squad. When the killings stopped, the most senior member of the Murder Squad claimed that the serial killer had committed suicide and an innocent man was named in a deceitful cover-up. The author fingers the real serial killer, a celebrity and national treasure who died in circumstances arguably even more bizarre than the manner in which he murdered his victims. The Licit Life of Capitalism Hannah Appel 2019-12-13 The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws an extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoqueinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

Shadowland Douglas Thompson 2011-10-14 Shadowland is a revelatory and dramatic true-life thriller spanning much of the twentieth century, a page-turning chronicle of an elaborate Mafia plan to 'invade' Europe using 1960s London as a bridgehead. The capital city of the Swinging Sixties was also a world of gambling, guns and gangsters. Several veterans of the era are astonished that they survived it and some feel protected enough - now that most of the killers are themselves dead - to reveal to bestselling author Douglas Thompson the details and secrets of one of history's greatest criminal conspiracies, and of how world-champion boxer Freddie Mills really died. The tension in this real-life narrative is ferocious as the tale moves from London to New York and Las Vegas, down to Miami, then on to the Bahamas and back to an unexpected denouement in London. Brutal, terrifying and intrigue-packed, it is an account of the Mob's Machiavellian global manipulation of governments and officials. Shadowland recounts events from the viewpoint of the pawns as well as the kingmakers. All the big players of Mafia history are here, controlled by the gangster genius Meyer Lansky, but so are the hit men, the fixers, the hoodlums and the wiseguy.

The Cutter Michael Litchfield 2011 When Heather Barnett happily opened her front door to a caller one morning in November 2002, little did she know that she was about to come face to face with her killer. Tragically, her mutilated body was discovered by her son and daughter on their return home from school that day. The police quickly ascertained that the murder was premeditated and meticulously planned to the last macabre detail; the killer had not left a single DNA clue—even the bloody footprints made by a distinctive pair of trainers did not lead out of the house but ended in the front room, without further trace. As a bizarre and sickening calling card, the killer had placed a lock of someone else's hair in the victim's hand. Detectives were shocked by the savagery of the murder and baffled by the apparently sadistic ritualism of the killing. Many long months of enquiries followed and, eventually, a lead came from Interpol: the parents of a missing girl in Italy had been sent a lock of hair in the post. Could the two murders be linked and had the police just made the breakthrough they so desperately needed? In this in-depth and chilling book, acclaimed true crime writer Michael Litchfield investigates the full story of Danilo Restivo, the killer behind the murder of Heather Barnett.

Fearless Freddie Chris Evans 2017-07 Fearless Freddie is the story of Britain's first boxing superstar. A legend who had it all: a young family, regular TV appearances, and a thriving nightclub. Surely someone this outgoing would not kill himself? However, Freddie was a man with dark secrets. Did those secrets drive him to take his own life, or was it something more sinister?

Too Big to Walk: The New Science of Dinosaurs Brian J. Ford 2018-05-31 Ever since Jurassic Park we thought we knew how dinosaurs lived their lives. In this remarkable new book, Brian J. Ford reveals that dinosaurs were, in fact, profoundly different from what we believe, and their environment was unlike anything we have previously thought.

The Black Box Michael Connelly 2012-11-26 In this "superb" thriller, Detective Harry Bosch links the bullet from a recent crime to the unsolved killing of a young female photographer during the 1992 L.A. riots (Wall Street Journal). In a case that spans 20 years, Harry Bosch links the bullet from a recent crime to a file from 1992, the killing of a young female photographer during the L.A. riots. Harry originally investigated the murder, but it was then handed off to the Riot Crimes Task Force and never solved. Now Bosch's ballistics match indicates that her death was not random violence, but something more personal, and connected to a deeper inquiry. Like an investigator combing through the wreckage after a plane crash, Bosch searches for the "black box," the one piece of evidence that will pull the case together. Riveting and relentlessly paced, The Black Box leads Harry Bosch, "one of the greats of crime fiction" (New York Daily News), into one of his most fraught and perilous cases.

The Murder of Sonny Liston Shaun Assael 2016-10-20 On January 5th 1971, former heavyweight champion Sonny Liston was found dead at his Las Vegas home. Liston's death, labelled an overdose, has long hung over Las Vegas and the boxing world, leaving unanswered questions about his ties to mob kingpins, drug lords, billionaire hoteliers and powerful promoters. Against the backdrop of the pivotal era in the history of Las Vegas when the mob turned a sleep desert oasis into a gambling paradise, Shaun Assael's The Murder of Sonny Liston is both a riveting murder hunt and a stunning portrait of a city that was home to the Rat Pack, race riots and glittering high-rises along the strip.

Economic Security Sheila R. Ronis 2012-04-20 Historically, national security includes the strength of our nation's infrastructure, the foundation upon which the continuous growth of our society depends. This includes our strong societal and moral codes, the rule of law, stable government, social, political, and economic institutions, and leadership. Also included are our nation's schools and educational programs to ensure a knowledgeable citizenry and lifelong learning—a must for a democracy. Our nation's strength also requires investments in science, engineering, research and development, and technological leadership. We cannot be strong without a viable way to power our cities, feed ourselves, and move from one place to another. Most of all, a strong economy is an essential ingredient of a global superpower. Without it, we will lose our superpower status, and quickly. National security must include a healthy market-based economy, with a strong base of globally competitive products and services that produce jobs. This economy must include sound government policies to promote responsible choices and reduce our debt, and grand strategies for energy and environmental sustainability, science and technology leadership (at least in some areas), human capital capabilities, manufacturing, and the industrial base. And these are not the only components. National security goes to the very core of how we define who we are as a people and a free society. It concerns how we view our world responsibilities. Economic security is a major element of national security, even as borders are less important than ever. No matter how we look at national security, there can be no question of the need to include the economic viability of our nation. Without capital, there is no business; without business, there is no profit; without profit, there are no jobs. And without jobs, there are no taxes, and there is no military capability. The viability of a nation's industrial infrastructure, which provides jobs for its people, creates and distributes wealth, and leverages profits, is essential. Without jobs, the quality of peoples' lives deteriorates to a point where society itself can disintegrate. It can also lead to strife on many different levels. As a nation, we need to find a strategy to deal with this, and we will discuss the ideas of expeditionary economics. But poverty is not only a problem in Third World countries. It can occur at home, too—especially during a deep recession. No community, local or global, can sustain indefinitely whole populations of "haves" and "have nots." And that gap is now growing within the United States. There is no question that a part of the infrastructure of a nation must include a sound economy. It was the relative deterioration of the Japanese and German economies that led those nations into World War II. Poverty around the world is a global systemic issue that frequently can and does lead to political instability. But we cannot help others if we cannot help ourselves, and our current economic crisis is a warning. National security is societal, political, and economic strength. In today's world, national security for a superpower is meaningless without a strong military capability as well. The sovereignty and security of the United States, and the protection of its citizens and property around the world, remain the bedrock of national security. The execution of U.S. national security strategy is conducted in a highly volatile global environment characterized by quantum changes in technology; unprecedented social, economic, and political interdependencies; broadened opportunities to foster democratic principles; and allegiances and alliances frequently founded on interests other than traditional nationalism. Understanding the complex systems nature of national security and why the economy is a part of the equation is crucial. National Defense University.

Karloff and the East Scott Allen Nollen 2021-01-13 Among Golden Age Hollywood film stars of European heritage known for playing characters from the East—Chinese, Southeast Asians, Indians and Middle Easterners—Anglo-Indian actor Boris Karloff had deep roots there. Based on extensive new research, this biography and career study of Karloff's "eastern" films provides a critical examination of 41 features, including many overlooked early roles, and offers fresh perspective on a cinematic luminary so often labeled a "horror icon." Films include The Lightning Raider (1919), 14 silent films from the 1920s, The Unholy Night (1929), The Mask of Fu Manchu (1932), The Mummy (1932), John Ford's The Lost Patrol (1934), the Mr. Wong series (1938-1940), Targets (1968), and Isle of the Snake People (1971), one of six titles released posthumously.

Free To Choose Milton Friedman 1990-11-26 INTERNATIONAL BESTSELLER A powerful and persuasive discussion about economics, freedom, and the relationship between the two, from today's brightest economist. In this classic discussion, Milton and Rose Friedman explain how our freedom has been eroded and our affluence undermined through the explosion of laws, regulations, agencies, and spending in Washington. This important analysis reveals what has gone wrong in America in the past and what is necessary for our economic health to flourish.

Life and Times of Frederick Douglass Frederick Douglass 1882 Frederick Douglass recounts early years of abuse, his dramatic escape to the North and eventual freedom, abolitionist campaigns, and his crusade for full civil rights for former slaves. It is also the only of Douglass's autobiographies to discuss his life during and after the Civil War, including his encounters with American presidents such as Lincoln, Grant, and Garfield.

The Pinks Chris Ess 2017-07-01 The true story of Kate Warne and the other women who served as Pinkertons, fulfilling the adage, "Well-behaved Women Seldom Make History." Most students of the Old West and American law enforcement history know the story of the notorious and ruthless Pinkerton Detective Agency and the legends behind their role in establishing the Secret Service and tangling with Old West Outlaws. But the true story of Kate Warne, an operative of the Pinkerton Agency and the first woman detective in America—and the stories of the other women who served their country as part of the storied crew of crime fighters—are not well known. For the first time, the stories of these intrepid women are collected here and richly illustrated throughout with numerous historical photographs. From Kate Warne's probable affair with Allan Pinkerton, and her part in saving the life of Abraham Lincoln in 1861 to the lives and careers of the other women who broke out of the Cult of True Womanhood in pursuit of justice, these true stories add another dimension to our understanding of American history.

Fights James Morton 2005-01-01 In July 1965 Freddie Mills, popular former light heavyweight champion of the world, was found shot in an alleyway off London's Charing Cross Road. Was he murdered and if so by whom? Did he kill himself and if so why should this happily married man whose popularity was immense take his own life? A year later Britain's second world champion of the era, the middleweight Randolph Turpin who defeated the fabulous Sugar Ray Robinson, was found shot dead in a room above his cafe in Leamington Spa. How did this man who earned thousands during his career come to end his life in a backstreet cafe? Or was he also murdered to prevent him getting the money due to him from his career? Morton looks at the role of their managers and promoters and the relationship with the Boxing Board of Control. Should many of Mills' fights and some of Turpin's have been sanctioned? Is this in part what led to their deaths? Where did their money go? Gambling, women, protection? Is there any possible truth in the persistent rumours that Mills was the so-called Jack the Stripper, killer of prostitutes in Hammersmith?

30 Most Convincing Cases Of Reincarnation Trutz Hardo 2016-08-17 • Children's memories of past lives • Adults' memories of past lives • Reincarnation revealed through regression therapy Once you have read this book, you will no longer be the same person as you are now, at least as far as your outlook on life is concerned. Since the end of the year 2000, reincarnation has finally been proven. The famous psychiatrist Professor Ian Stevenson M.D. has scientifically proven that reincarnation is a fact. A number of case histories substantiate this claim. Some of these have come from children and adults who remembered their past lives accurately. Others were retrieved by means of regression techniques. The interest in reincarnation is growing every year. Today we no longer need to simply have faith, since reincarnation has been scientifically proven, just as the law of gravity was proven some time ago. We are now able to know that it is possible to return to this world repeatedly. What was until recently a belief for millions of people has now been discovered to be a truth. Trutz Hardo is a well-known expert on reincarnation and regression therapy. He holds seminars in Europe, Australia, U.S.A. and India. He has appeared on several television programmes.

I'm Glad My Mom Died Jennette McCurdy 2022-08-09 #1 NEW YORK TIMES BESTSELLER #1 INTERNATIONAL BESTSELLER A heartbreaking and hilarious memoir by iCarly and Sam & Cat star Jennette McCurdy about her struggles as a former child actor—including eating disorders, addiction, and a complicated relationship with her overbearing mother—and how she retook control of her life. Jennette McCurdy was six years old when she had her first acting audition. Her mother's dream was for her only daughter to become a star, and Jennette would do anything to make her mother happy. So she went along with what Mom called "calorie restriction," eating little and weighing herself five times a day. She endured extensive at-home makeovers while Mom chided, "Your eyelashes are invisible, okay? You think Dakota Fanning doesn't tint hers?" She was even showered by Mom until age sixteen while sharing her diaries, email, and all her income. In *I'm Glad My Mom Died*, Jennette recounts all this in unflinching detail—just as she chronicles what happens when the dream finally comes true. Cast in a new Nickelodeon series called iCarly, she is thrust into fame. Though Mom is ecstatic, emailing fan club moderators and getting on a first-name basis with the paparazzi ("Hi Gale!"), Jennette is riddled with anxiety, shame, and self-loathing, which manifest into eating disorders, addiction, and a series of unhealthy relationships. These issues only get worse when, soon after taking the lead in the iCarly spinoff Sam & Cat alongside Ariana Grande, her mother dies of cancer. Finally, after discovering therapy and quitting acting, Jennette embarks on recovery and decides for the first time in her life what she really wants. Told with refreshing candor and dark humor, *I'm Glad My Mom Died* is an inspiring story of resilience, independence, and the joy of shampooing your own hair.

Government to Government Susan Johnson 2000 State and tribal governments have common purposes: to use public resources effectively and efficiently, to provide comprehensive services to their respective citizens, and to protect the natural environment, all while sustaining healthy economies. Neighboring governments, as a practical matter, share many aspects of their respective economic and social systems, and are connected through political and legal relationships. Although these mutual interests have created jurisdictional disputes that historically have been solved through litigation, there is an increasing need for cooperation. Public resources are an issue for all governments, and state and tribes can benefit by collaborating and pooling resources to the fullest extent possible.

An African American and Latinx History of the United States Paul Ortiz 2018-01-30 An intersectional history of the shared struggle for African American and Latinx civil rights Spanning more than two hundred years, *An African American and Latinx History of the United States* is a revolutionary, politically charged narrative history, arguing that the "Global South" was crucial to the development of America as we know it. Scholar and activist Paul Ortiz challenges the notion of westward progress as exalted by widely taught formulations like "manifest destiny" and "Jacksonian democracy," and shows how placing African American, Latinx, and Indigenous voices unapologetically front and center transforms US history into one of the working class organizing against imperialism. Drawing on rich narratives and primary source documents, Ortiz links racial segregation in the Southwest and the rise and violent fall of a powerful tradition of Mexican labor organizing in the twentieth century, to May 1, 2006, known as International Workers' Day, when migrant laborers—Chicana/os, AfroCubanos, and immigrants from every continent on earth—united in resistance on the first "Day Without Immigrants." As African American civil rights activists fought Jim Crow laws and Mexican labor organizers warred against the suffocating grip of capitalism, Black and Spanish-language newspapers, abolitionists, and Latin American revolutionaries coalesced around movements built between people from the United States and people from Central America and the Caribbean. In stark contrast to the resurgence of "America First" rhetoric, Black and Latinx intellectuals and organizers today have historically urged the United States to build bridges of solidarity with the nations of the Americas. Invisibly and timely, this bottom-up history, told from the interconnected vantage points of Latinx and African Americans, reveals the radically different ways that people of the diaspora have addressed issues still plaguing the United States today, and it offers a way forward in the continued struggle for universal civil rights. 2018 Winner of the PEN Oakland/Josephine Miles Literary Award

Singled Out Andrew Maraniss 2021-03-02 *[An] excellent exercise in narrative nonfiction. --Booklist (starred review) From New York Times bestselling author Andrew Maraniss comes the remarkable true story of Glenn Burke, a "hidden figure" in the history of sports: the inventor of the high five and the first openly gay MLB player. Perfect for fans of Steve Sheinkin and Daniel James Brown. On October 2nd, 1977, Glenn Burke, outfielder for the Los Angeles Dodgers, made history without even swinging a bat. When his teammate Dusty Baker hit a historic home run, Glenn enthusiastically congratulated him with the first ever high five. But Glenn also made history in another way—he was the first openly gay MLB player. While he did not come out publicly until after his playing days were over, Glenn's sexuality was known to his teammates, family, and friends. His MLB career would be cut short after only three years, but his legacy and impact on the athletic and LGBTQIA+ community would resonate for years to come. New York Times bestselling author Andrew Maraniss tells the story of Glenn Burke: from his childhood growing up in Oakland, his journey to the MLB and the World Series, the joy in discovering who he really was, to more difficult times: facing injury, addiction, and the AIDS epidemic. Packed with black-and-white photographs and thoroughly researched, never-before-seen details about Glenn's life, *Singled Out* is the fascinating story of a trailblazer in sports—and the history and culture that shaped the world around him. Praise for *Singled Out*: "A compelling narrative. . . This is a meticulously researched history of the ways queer culture in the '70s intersected with baseball, Blackness, and larger culture wars, with one man at their center." --Kirkus Reviews

The Escape Artist Helen Fremont 2020-02-11 A luminous new memoir from the author of the critically acclaimed national bestseller *After Long Silence*. *The Escape Artist* has been lauded by New York Times bestselling author Mary Karr as "beautifully written, honest, and psychologically astute. A must-read." In the tradition of Alison Bechdel's *Fun Home* and George Hodgman's *Bettyville*, Fremont writes with wit and candor about growing up in a household held together by a powerful glue: secrets. Her parents, profoundly affected by their memories of the Holocaust, pass on to both Helen and her older sister a zealous determination to protect themselves from what they see as danger from the outside world. Fremont delves deeply into the family dynamic that produced such a startling devotion to secret keeping, beginning with the painful and unexpected discovery that she has been disinherited in her father's will. In scenes that are frank, moving, and often surprisingly funny, she writes about growing up in such an imperate household, with parents who pretended to be Catholics but were really Jews—and survivors of Nazi-occupied Poland. She shares tales of family therapy sessions, disordered eating, her sister's frequently unhinged meltdowns, and her own romantic misadventures as she tries to sort out her sexual identity. Searching, poignant, and ultimately redemptive, *The Escape Artist* is a powerful contribution to the memoir shelf.

The Autobiography of Malcolm X Malcolm X 2015-11-26 *The Autobiography of Malcolm X* was intended to be a true autobiography, with the name of Alex Haley appearing not at all or as a ghost writer or as a mere contributor or assistant. However, with the assassination of Malcolm X having occurred in Harlem in New York City on February 21, 1965 just before this book could be published, it became necessary to reveal the important role of Alex Haley in creating this book.

The Cloud Revolution Mark P. Mills 2021-10-19 The conventional wisdom on how technology will change the future is wrong. Mark Mills lays out a radically different and optimistic vision for what's really coming. The mainstream forecasts fall into three camps. One considers today as the "new normal," where ordering a ride or food on a smartphone or trading in bitcoins is as good as it's going to get. Another foresees a dystopian era of widespread, digitally driven job- and business-destruction. A third believes that the only technological revolution that matters will be found with renewable energy and electric cars. But according to Mills, a convergence of technologies will instead drive an economic boom over the coming decade, one that historians will characterize as the "Roaring 2020s." It will come not from any single big invention, but from the confluence of radical advances in three primary technology domains: microprocessors, materials, and machines.

Microprocessors are increasingly embedded in everything. Materials, from which everything is built, are emerging with novel, almost magical capabilities. And machines, which make and move all manner of stuff, are undergoing a complementary transformation. Accelerating and enabling all of this is the Cloud, history's biggest infrastructure, which is itself based on the building blocks of next-generation microprocessors and artificial intelligence. We've seen this pattern before. The technological revolution that drove the great economic expansion of the twentieth century can be traced to a similar confluence, one that was first visible in the 1920s: a new information infrastructure (telephony), new machines (cars and power plants), and new materials (plastics and pharmaceuticals). Single inventions don't drive great, long-cycle booms. It always takes convergent revolutions in technology's three core spheres—information, materials, and machines. Over history, that's only happened a few times. We have wrong much magic from the technologies that fueled the last long boom. But the great convergence now underway will ignite the 2020s. And this time, unlike any previous historical epoch, we have the Cloud amplifying everything. The next long boom starts now.
