In his autobiography, Toward Freedom, Jawaharlal Nehru, describes the landmarks in the Indian Freedom Struggle. In this volume, while in jail in 1934, he writes 196 letters to his daughter Indira, which provide a panorama of world history- all without any access to a reference library. Truly mesmerizing stuff.

Farewell Song (Modern Classics) Rabindranath Tagore 2011-05 Rabindranath Tagore reinvented the Bengali novel with Farewell Song, blurring the lines between prose and poetry and creating an effervescent blend of romance and satire. Through Amit and Labanya and a brilliantly etched social milieu, the novel addresses contemporary debates about 'good' and 'bad' writing, the nature of love and conjugality, and the influence of Western culture on Bengali society. Set against the idyllic backdrop of Shillong and the mannered world of elite Calcutta society, this sparkling novel expresses the complex vision and the mastery of style that characterized Tagore's later works. Tagore was not only an immensely versatile poet; he was also a great short story writer, novelist, playwright, essayist, and composer of songs Amartya Sen

This work provides insight into comparative and international education work in Australia and New Zealand, where an emerging local style may be developing into a full blown national approach. The 14 essays address issues such as education in third-world Asia, sexism, and culture and power. There is recurring focus on ethics in research, education development, the role of international agencies, inequality, legitimacy and the link between comparative education and education practice. This a great reflection on the field as a whole, with contributions mostly from one area of the world but with a complete international spread of consideration.

Quality in School Education Manju Narula 2006 Over the years, the Boards of Secondary Education have undergone a process of functional change from being examination Boards to Secondary Education Boards and finally to Boards of School Education. This has resulted in many modifications in the working of the Boards. Even then, the Boards are facing many challenges. The main challenge before the Boards are that there is a constant threat of knowledge getting obsolete day by day, on the other the requirement for updating the existing facilities remains a financial challenge. The Boards need to widen the sphere of their operations and increasingly support schools in undertaking innovative activities and in offering high quality education. They need to adopt several measures, for instance, concerning academic guidance and supervision, preparation of quality teaching-learning material, adoption of progressive modes of evaluating students' performance, training of teachers, principals and other personnel, and evaluation of the performance of schools affiliated to them. In addition, revolutionary advancements in communications technology have broken the national boundaries. As a consequence, globalization has created several avenues and possibilities for educational sector. Therefore, there is exigency to see how Boards of Secondary Education are prepared for facing these challenges. The Boards must think constantly about the ways and means to absorb the changes. The present book deals with role of Boards in managing change and quality of Secondary Education in four states of India, i.e., Himachal Pradesh, Madhya Pradesh, West Bengal and Andhra Pradesh.

Revisiting Mathematics Education Hans Freudenthal 2006-04-11 This book is a product of love and respect. If that sounds rather odd I initially apologise, but let me explain why I use those words. The original manuscript was of course Freudenthal's, but his colleagues have carried the project through to its conclusion with love for the man, and his ideas, and with a respect developed over years of communal effort. Their invitation to me to write this Preface enables me to pay my respects to the great man, although I am probably incurring his wrath for writing a Preface for his book without his permission! I just hope he understands the feelings of all colleagues engaged in this particular project. Hans Freudenthal died on October 13th, 1990 when this book project was well in hand. In fact he wrote to me in April 1988, saying "I am thinking about a new book. I have got the sub-title (China Lectures) though I still lack a title". I was astonished. He had retired in 1975, but of course he kept working. Then in 1985 we had been helping him celebrate his 80th birthday, and although I said in an Editorial Statement in Educational Studies in Mathematics (ESM) at the time "we look forward to him enjoying many more years of non-retirement" I did not expect to see another lengthy manuscript.
