*Corso Completo di Windows Server 2019 Istituto Lavoro 2021-03-18 Circa 10 anni fa, Microsoft ha modificato la propria ideologia di rilascio del sistema operativo in modo che l'ultimo sistema operativo Windows Server sia sempre strutturato in modo molto simile al più recente sistema operativo client Windows. Questa è stata la tendenza da un po' di tempo, con Server 2008 R2 che riflette da vicino Windows 7, Server 2012 che si sente molto simile a Windows 8 e molte delle stesse funzionalità di usabilità fornite con l'aggiornamento di Windows 8.1 sono incluse anche con Server 2012 R2. Questo, ovviamente, è stato trasferito anche a Server 2016, dandogli lo stesso aspetto e aspetto come se fossi connesso a una workstation Windows 10. Ora che tutti abbiamo familiarità e ci sentiamo a nostro agio con l'interfaccia di Windows 10, in genere non abbiamo problemi a saltare direttamente all'interfaccia di Server 2016 e a fare un giro di prova. Windows Server 2019 non fa ancora una volta eccezione a questa regola, tranne per il fatto che il rilascio dei sistemi operativi lato client è leggermente spostato. Ora, invece di rilasciare nuove versioni di Windows (11, 12, 13 e così via), per il momento stiamo semplicemente attenendoci a Windows 10 e fornendogli numeri di sotto-versione, indicativi delle date in cui quel sistema operativo è stato rilasciato. Ad esempio, la versione 1703 di Windows 10 è stata rilasciata intorno a marzo del 2017. La versione 1709 di Windows 10 è stata rilasciata a settembre del 2017. Quindi, abbiamo avuto anche il 1803 e il 1809, sebbene il 1809 sia stato leggermente ritardato e non sia stato rilasciato fino a un punto più vicino a Novembre, ma non era il piano originale. Il piano attuale prevede che il sistema operativo Windows venga rilasciato ogni sei mesi circa, ma aspettarsi che i reparti IT sollevino e spostino tutti i loro server solo allo scopo di passare a un sistema operativo più recente di sei mesi è pazzesco; a volte ci vuole più tempo solo per pianificare una migrazione.*

*Exam 70-411 Administering Windows Server 2012 Microsoft Official Academic Course 2013-03-25 Microsoft Windows Server is a multi-purpose server designed to increase reliability and flexibility of a network infrastructure. Windows Server is the paramount tool used by enterprises in their datacenter and desktop strategy. The most recent versions of Windows Server also provide both server and client virtualization. Its ubiquity in the enterprise results in the need for networking professionals who know how to plan, design, implement, operate, and troubleshoot networks relying on Windows Server. Microsoft Learning is preparing the next round of its Windows Server Certification program with exams covering the new version of the software, Windows Server 2012. The exams and certification path change significantly from the previous version of Windows Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand-new software and brand-new certifications.*
